Xantaro Network Operations Center (XNOC)

CUSTOMISED NETWORK OPERATION IN REAL TIME: READY FOR THE DEMANDS OF THE DAY AFTER TOMORROW

The effective functioning of a high-performance network extends beyond monitoring. Companies can seek assistance from an experienced external partner capable of managing specific components or the entire network, providing support up to the 2nd and 3rd level, and expanding their role as needed. This includes handling incident and change management, predictive management and configuration. Xantaro Network Operations Centre (XNOC) is able to offer you this service.
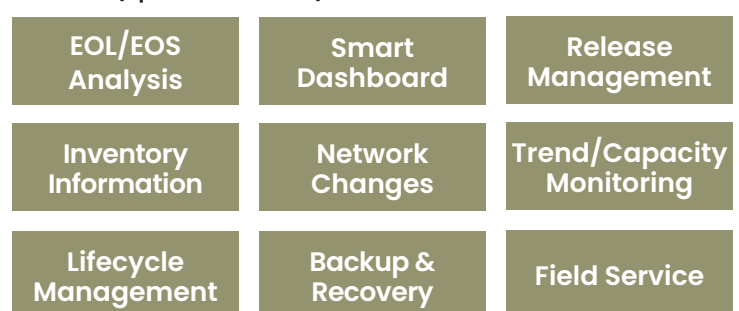

CHALLENGES

- Constantly increasing network complexity due to new security rules and regulations
- Increasing demands on network availability
- A shortage of skilled workers and demographic change are causing labor costs to continue to rise
- Network operation ties up specialised personnel, who are therefore not available for IT projects with higher added value
- Exhausted budget and/or increasing pressure to optimise costs

XNOC (Core)

Basic	Operations	Prediction
Monitoring Alarming Dispatching	Incident & Change Management	Predictive Management

+

XNOC (optional modules)

EOL/EOS Analysis	Smart Dashboard	Release Management
Inventory Information	Network Changes	Trend/Capacity Monitoring
Lifecycle Management	Backup & Recovery	Field Service

YOUR ADVANTAGES

- Cost savings/optimisations
- More resources and budget for high-priority IT projects
- SLA-based services from an experienced partner with a high level of certification
- Multi-vendor support
- Customised and flexible modules for operational support
- 24/7/365 service via single point of contact
- Incident management with Xantaro Technical Assistance Centre (XTAC)
- Proactive control and maintenance of the network

WHY XANTARO?

- Europe's leading team of network specialists with a total of over 700 certifications

- Decades of experience in the planning, construction, operation and maintenance of high-performance networks

- Vendor-neutral state-of-the-art monitoring-platform

- Flexible solution design for the operation of individual network services or of complete network infrastructures

OUR EXPERTS LOOK FORWARD TO LEARNING MORE ABOUT YOUR REQUIREMENTS!
